Experiment 2: Mobile Station User Interface Prototype

Aim: To create a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile-sized frame for the mobile station interface.
3. Add a status area showing signal strength, network status, and battery level.
4. Add simple interface elements such as Call, Messages, Contacts, and Settings.
5. Use clear icons and readable labels for convenience.
6. Connect relevant screens or buttons using prototype interactions, then review and save the design.

Output:

Result: A mobile station user interface prototype considering connectivity and convenience was created successfully.
