Experiment 11: Secure Mobile Application Wireframe

Aim: To design a wireframe for a mobile application that incorporates security measures using Figma.

Procedure:

1. Open Figma and create a mobile-sized frame.

2. Add the application title and username and password fields.

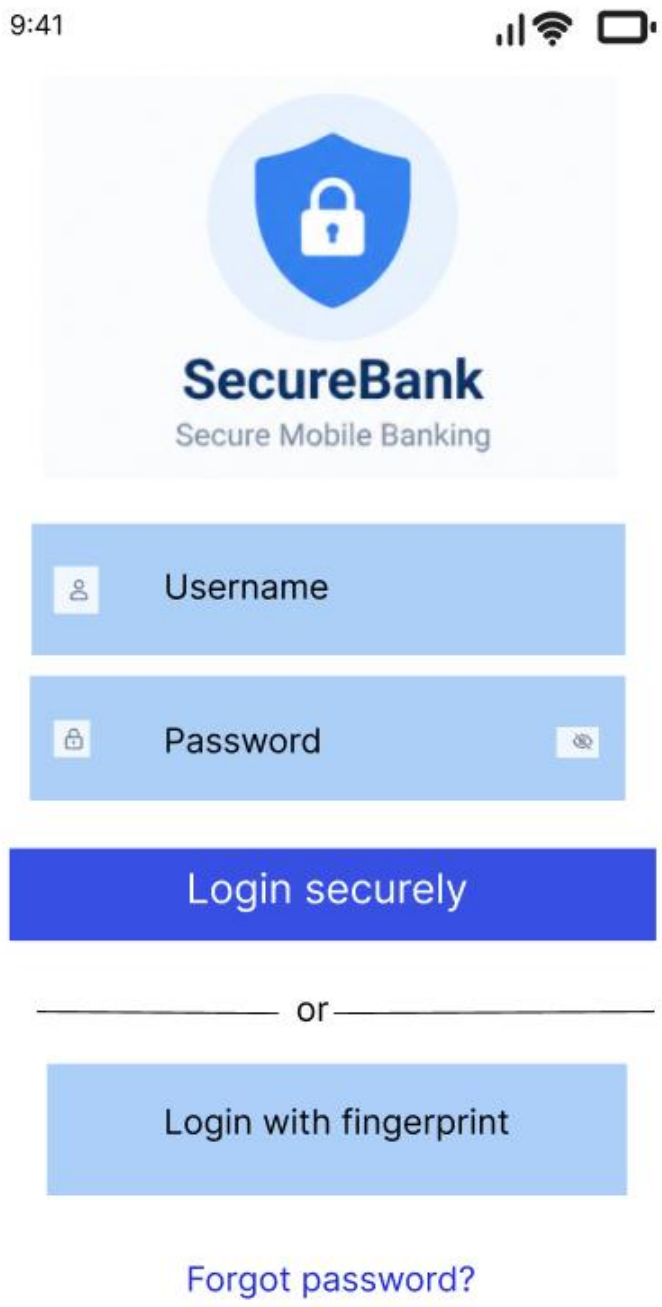

3. Add a secure login button and a forgot-password option.

4. Include a fingerprint or biometric login option.

5. Display a security notice such as “Encrypted Connection”.

6. Use readable text, consistent spacing, and suitable colors, then save the wireframe.

Output:

Result: A mobile application wireframe incorporating security measures was designed successfully.
