Experiment 7: Cellular System Performance Dashboard

Aim: To develop a dashboard prototype in Figma displaying performance criteria for a cellular system.

Procedure:

1. Open Figma and create a dashboard-sized frame.
2. Add a title for the Cellular Network Performance Dashboard.
3. Create metric cards for signal strength, network availability, active users, and data throughput.
4. Use simple charts or indicators to show performance values.
5. Arrange the cards and charts in a clear, readable layout.
6. Review the dashboard and save the prototype.

Output:

Result: A dashboard prototype displaying cellular-system performance criteria was developed successfully.
