Course Name: Mobile Computing

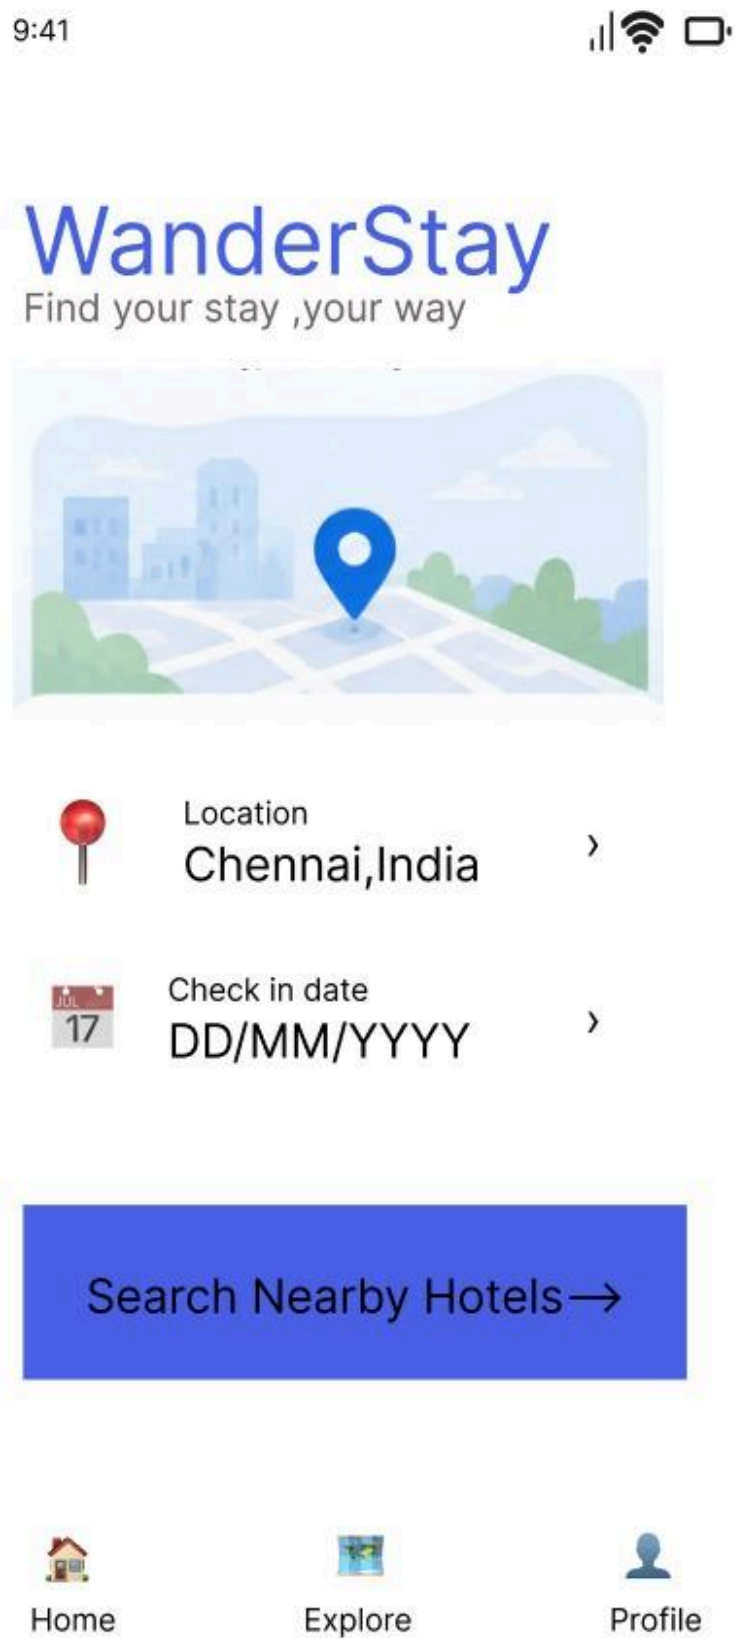

Experiment 5: Mobile Application with Localization Features

Aim: To design a wireframe for a mobile application that incorporates localization features using Figma.

Procedure:

1. Open Figma and create a mobile-sized frame.
2. Add a title and a location search field.
3. Include a map area with a location marker and nearby-place information.
4. Add controls such as Current Location, Search, and Directions.
5. Use clear labels and simple icons to make location features easy to understand.
6. Review the layout and save the wireframe.

Output:

9:41
WanderStay
Find your stay ,your way
Location
Chennai,India
